

DISTILLERS GRAINS TECHNOLOGY COUNCIL

MEMBERSHIP ADVANTAGES

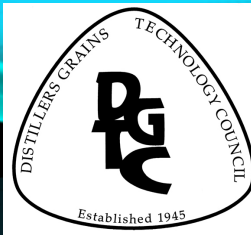

FULL MEMBERSHIP

Seat on Board of Directors

Active role in Council activities and educational/outreach efforts

**Opportunity for an unlimited number of company personnel
To attend the annual symposium at a reduced-member rate**

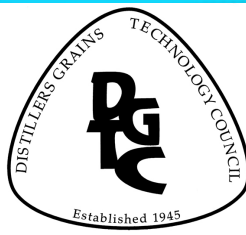

DGTC provides an exceptional environment for networking with professional contacts, ingredient suppliers, and equipment suppliers on a continuing basis

ASSOCIATE MEMBERSHIP

Provide opportunity to stay abreast of new manufacturing technologies and keep you up-to-date on advances in fermentation, distillation, fractionation & other processes

Opportunity for two company personnel to attend Annual symposium at reduced-member rate

DGTC OVERVIEW

WHAT THE DGTC PROVIDES

Annual symposium is a professional forum for updates from industry and government experts on a wide variety of topics including new manufacturing technologies, current market conditions and trends, regulatory news and actions, recent industry news and projections for future changes for all.

Continuing updates on programs and efforts to produce higher value distillers' coproducts, such as fractionated oil, protein, fiber, and dried solubles, products that the marketplace desires the most and with quality specifications they want.

Education on industry critical issues such as mycotoxins contamination, FSMA program, carbon capture and sequestration, antibiotic use in fermentation, distillers grains, and spent grains use.

Leadership on lab proficiency program. Effort is to ensure lab testing conforms to accepted standards and methods used, and that reported results are accurate.

Serves as an informed interface with government agencies (FDA, USDA, EPA, GIPSA, etc.) on regulations regarding industry practices and issues.

DGTC has funded research on animal feeding of distillers coproducts for over 70 years. Data and information needed for marketing these coproducts is available to members.

COST TO JOIN

Full membership
\$9,000 annually

Associate membership
\$1,000 annually

Reduced rate for symposium attendance is \$300 savings per attendee
